

My Five Year Climate Action Plan

Amy K 1/23/2023

Wide world work

Continue to learn from and back Haudenasuane leadership in climate work

Continue to work with TBK, RAC NY, JCLC, and RAICA toward zero emissions for our building, educate and encourage members to form their own climate plans on the personal and community level

Continue to lead periodic discussions on climate change connecting people's hearts with opportunities to share feelings and factual information using the framework Dayenu uses

Keep connecting with people with the intention of having them come to a 6 week climate covenant class in the Fall

Continue connections with GLT and SPINI and encourage others to learn more about their work

Personal

Continue to challenge myself by eating locally, in season and low on the food chain.

Re assess carbon footprint to see if progress was truly made this year.

Start looking at replacements to 21 year old car. Over next 3 years research different plug ins and plug in hybrids and try to test drive options. Continue saving for.

Continue budgeting to transition to heat pump in next 4 years. Keep comparing air to air systems to geothermal.

Get pricing to expand solar system and battery backup to cover new electric appliances and utilities.

RC

Continue at least quarterly to use the unified goal as a topic for my monthly Jewish support group.

Continue building connections with other climate leaders by attending (on Zoom) different climate workshops and support groups.

Consider leading a second session on the unified goal in the challenges support group
