

## Introduction

Resiliency, Equity, Education, mutual support and engaged listening is my five-year roadmap towards climate justice.

Unified under both of the UNFCCC and SAL shared vision, I think these five years Climate Action Plan will establish new efficient supportive actions under loss and damages and build off an impressive amount of work done by RC through his program SAL.

We are struggled to limit the effects of human-caused catastrophic climate change and restore the environment, but practical, smart and concrete actions needed on earth keeping and justice peace and integration of the creation such as:

- RC – youth and young adult international forum on climate change; in order to availing youth with a platform to celebrate their oneness and oneness
- Organisation of RC Green youth academies (With skills sharing on climate emergencies, RC classes specified on climate issues, sessions of discharge, listening circles with youth affected and stressing by the issue, planting campaign)
- RC Training manual on climate (collection of best practices on climate resilience, basic guide to powerful practice in listening exchanges etc...)
- Celebration of RC climate action days: Every year, youth from RC communities in Africa, Asia and Germany take part in the campaign with different actions and ideas.
- This will aim at informing and sensitizing people for the issue of climate change and justice for example, special climate lessons in RC classes, promoting RC in universities or waste collection and tree-planting actions in the public.
- As the climate change is a global issue there will be a worldwide networking and exchange of actions among the young people on social media.
- RC climate convention (After every COP) Where we are going to share out coming from COP, Inputs of our sides events during the recent COP'S, management of news people we have met during the COP in green or blue zone) it can be virtual or in person
- Appointment of RC Areas climate AMBASSADOR (in each Region they will be some one who will care about Climate activities in order to Well equipped participants to the COP and other climate events ..
