

Five Year Climate Change Work Plan

1. Keep discharging on climate (and on the interface/intersection between everything I counsel on and climate as it affects and is affected by all my distresses.)
2. Include decide-act-discharge DAD in my counseling on climate, using my work plans (and discharging on making the plan more goal and time specific.)

3. Develop a Climate Work Plan for my area, Brooklyn Sunset, along with the area leaders.
 - 3.1. Build the plan on DAD to keep climate central in our classes.
 - 3.2. Counsel regularly and think with my area's representative to our regional climate work group in order to make our climate work goals
 - 3.3. Counsel with and back area members who are doing active wide world work on climate.

- 4.. As social change activist working actively to build the Radical Elders organization. <https://radicalelders.net/> do DAD work on raising climate in whatever issue work we do.
 - 4.1. I am active in the Radical Elders climate work group. Continue to discharge so that I can effectively integrate RC tools, both listening practices and perspective, in particular the Unifief Goal perspectives that can contribute to building movement unity.
